

# adelco smart plaiter PRO-CURE

An advanced textile conveyor dryer that cures both **screen & digitally** garments with **four belt width options** to meet your production output requirements and a **plaiter** that carefully folds fabrics.

## Features

- Ovens lengths are **fully modular** to suit **any curing requirements**.
- The **dryer syncs with the printer** automatically, adjusting speeds accordingly.
- **Triple insulation with air curtain** for the coolest exterior shell available.
- Plaiter widths available at **1.8m, 2.7m & 3.2m**

Plaiting offers key benefits over roll-to-roll dryers. It **prevents curling** and **tension issues**, allowing the fabric to lay flat and avoid distortions that can complicate processing. Plaiting also **reduces wrinkles and creases** by minimizing pressure points, especially in delicate fabrics.

Fabric plaiter designed to delicately fold materials, available in the following widths **1.8m, 2.7m & 3.2m** options.
