Heat Press

Adelco's Heat Press models are meticulously crafted double-station systems designed to deliver optimal efficiency and productivity.

User-friendly touchscreen LCD panel for intuitive and convenient operation

Operates seamlessly in both full auto and semi-auto modes

Pressure indicator and triple timer settings for precise control and efficient operation

Operates in electric mode, eliminating the need for an air compressor

Adelco's Heat Press systems are celebrated for their utmost efficiency. Combining simplicity and effectiveness, these systems empower users to operate intuitively and seamlessly.

Advantages Adelco HP-1

- ◆ Exceptionally efficient with a dual-station design and pneumatic functionality.
- ◆ Complete threadability on the lower platens for enhanced versatility and ease of use.
- ◆ Dual quick-change lower platens for swift and effortless adaptability.
- ◆ Ideal for high-volume operations and specifically tailored for DTG printing, ensuring optimal performance.

Advantages Adelco HP-2

- ◆ Operates in electric mode, eliminating the requirement for an air compressor.
- ◆ Functions seamlessly in both full auto and semi-auto modes for enhanced operational flexibility.
- ◆ Equipped with a precision pressure indicator and a triple timer setting for accurate control and streamlined operation.
- ◆ Offers comprehensive threadability on the lower platens, enhancing versatility and simplifying the user experience.
- ◆ Features dual quick-change lower platens for a rapid and effortless adaptability, ensuring smooth transitions between different printing setups.

Advantages Adelco HP-3

- ◆ It encompasses all the features outlined in the HP-2 model.
- ◆ Ensure precise and consistent layout with the incorporated laser alignment system.
- ◆ Mobile caddie stand for enhanced portability and convenience.
- ◆ Convenient foot pedal for hands-free operation and seamless control.

Advantages Adelco HP-4

- ◆ It encompasses all the features outlined in the HP-2 model.
- ◆ Ensure precise and consistent layout with the incorporated laser alignment system.
- ◆ Mobile caddie stand for enhanced portability and convenience.
- ◆ Combining a responsive foot pedal with a lift stand for efficient and user-friendly operation.

Single Clam Heat Press

The Adelco **Single Clam Heat Press** is a meticulously crafted, **single-station system**. With its **semi-automatic functionality** and **compact design**, it is the perfect choice for small businesses.

User-friendly touchscreen LCD panel for intuitive and convenient operation

Operates seamlessly in semi-auto mode

Pressure indicator

Enhanced pull-out drawer with highlighted base

Introducing the newly designed **Adelco Single Clam Heat Press**, now featuring an improved assist slide handle for effortless operation. This semi-auto open machine is equipped with a convenient **slide-out base**, making transfer printing smoother and more efficient.

Key highlights include:

- **Stylish Design:** Modern and fashionable appearance paired with a durable, sturdy construction.
- **Versatile Functionality:** Threadable and interchangeable features make it adaptable for a variety of heat press applications, including T-shirts, frames, slippers, and other flat products.
- **User-Friendly Operation:** Enhanced slide-out handle for easy access and seamless workflow.
- **Wide Compatibility:** Ideal for all types of heat transfer applications, including toner transfer paper.

Perfectly suited for small, advanced businesses, this heat press offers a reliable and professional solution for diverse printing needs.

Some advance features include:

- **Effortless Semi-Auto Open Function:** This heat press is equipped with a convenient semi-auto open feature, saving you time and boosting efficiency during every use.
- **Convenient Pull-Out Drawer:** This heat press features a smooth pull-out drawer, providing ample space for easy garment loading and hassle-free operation.
- **Optional Quick-Change Platens:** Quick-change optional platens (sold separately) require no tools for setup, offering exceptional convenience and endless possibilities for working with various substrates.

Voltage	110V/220V
Heat Plate	40 x 50cm
Power	1400W - 2200W
Controller	LCD Controller
Max. Temperature	232°C / 450°F
Temp. Accuracy	±4°F / 2°C
Max. Pressing Force	360kg
Working Style	Lever Mechanism & Magnetic
Stand-by Feature	Max. 120mins
Thickness	≤1cm
Dimensions (LxWxH)	68 x 42 x 47cm
Packaging (LxWxH)	75.5 x 48.8 x 54cm
Product Weight	40kg
Shipping Weight	44kg
Certificate	CE, UKCA
